

Cool2Shape is the new product line from INUTEQ® focusing on burning fat and increasing metabolism by cooling.

## cool2shape waist wrap

**The science** Cooling stimulates Brown Adipose Tissue (brown fat) causing the consumption of calories. The science is backed by numerous international studies, scientific research and tests. Several studies mention the importance of brown fat and the potential of cold exposure to prevent an increase in body weight.

**How to use** For this line of products we use our unique INUTEQ-PAC® technology, the only REACH and USDA certificated 100% bio-based PCM on the market. Our easily integratable bio-based PCM cooling packs fit perfectly in our specially developed cooling vest and garments.

**Activation** Simply put the PCM inserts in ice water, refrigerator or freezer or store it under 10°C/50°F until it becomes fully solid. Cooling duration: up to 2,5 hours depending on environmental conditions.

1. COOL THE PCM INSERTS

2. INSERT IN YOUR GARMENT

3. ENJOY IMMEDIATE COOLING

### Available in

**Colors:** Black Art. nr.: 1325010100  
**Sizes:** One size  
**Insert:** Art. nr.: 1325011508  
 PCM inserts to be ordered separately

### Components

**Outer Material:** 50% nylon, 5% elastane, 45% neoprene  
**Adjustment:** Velcro
